About Me

I am a self-taught Front-End Developer from India. I love building websites and web apps that look great and work smoothly. I am a fresher looking for a Front-End Developer job where I can learn and grow.

Skills

Front-End: HTML, CSS, TailwindCSS, Sass(scss), JavaScript (ES6+), React.js, Next.js

Back-End: Node.js, Express.js, Next.js

Databases: MongoDB, NeonDB

Tools: Prisma, Google APIs, Clerk Authentication, NEXT-AUTH, JWT

Projects

1. Forever Ecommerce App
A Full-Stack e-commerce website.

- Built using HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, JWT, Axios, CORS, Bcrypt, Validator, Toastify, Cloudinary, Multer, Stripe, Razorpay.

- Live Site: https://forever-frontend-olive.vercel.app/

- Admin Panel: https://forever-admin-peach.vercel.app/

- **Admin Email:** admin@forever.com

- **Admin Password:** qwerty123

2. Imagify
A Full-Stack AI-powered image generation web app.

- Built using HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, JWT, Axios, CORS, Bcrypt, Validator, Toastify, Razorpay.

- Live Site: https://imagify-frontend-taupe.vercel.app/

3. Scheduler
A Full-Stack scheduling app.

- Built using HTML, CSS, JavaScript, React, Next.js, Prisma, NeonDB, ShadCN UI, Zod Validator, Google APIs, Clerk Authentication.

- Live Site: https://schedulrr-ruby.vercel.app/

4. Arjun Gupta's Shop
A modern landing page for a local shop.

- Built with React, Vite, Tailwind CSS for a fast and responsive design.

- Backend uses Node.js, Express, and Nodemailer for handling form submissions and email communication.

- Integrated React Hook Form, Zod for validation, Axios for API calls, and ESLint for code quality.

- Deployed on Vercel for seamless access.

- Live Site: https://arjun-gupta-shop-frontend.vercel.app/home

5. Saffron Bakery

A responsive bakery landing page.

- Built with React, Vite, Tailwind CSS, and smooth GSAP animations for an enhanced user experience.

- Backend powered by Node.js, Express, and Nodemailer for email handling.

- Used Helmet for security, React Hook Form and Zod for validation, and Axios for API calls.

- Deployed on Vercel for easy client access.

- Live Site: https://saffron-bakery-frontend.vercel.app/home

6. start_directory

An open-source startup directory platform inspired by YC Directory.

- Built using React 19, Next.js 15 (with Turbopack), Tailwind CSS, styled-components, and Radix UI for a responsive, sleek interface.

- Features GitHub login via NextAuth.js for secure authentication.

- Allows founders to submit and manage startup entries with descriptions, teams, external links, and more.

- Integrated Markdown support using react-md-editor, easymde, and Markdown-it for rich content creation.

- CMS-powered by Sanity.io for dynamic content structuring.

- Includes real-time view counting functionality for Posts.

- Ensures security using isomorphic-dompurify and rehype-sanitize.

- Live Site: https://startup-directory-silk.vercel.app/

Education

Self-Taught Front-End Developer

Certifications

- FreeCodeCamp - Responsive Web Design Certification

- FreeCodeCamp - JavaScript Algorithms and Data Structures Certification

- FreeCodeCamp - Front End Development Libraries Certification
